| | Mole cricket | Qld, NSW only | 200mL in 15L water per 100m ² | |
| | Grass-eating caterpillars | NSW, Qld, Vic, WA only | 30mL in 15L water per 100m ² | |

General Instructions

This product will control insects for 3-4 weeks. Pennside can be applied using all types of spray equipment. Use 50-mesh screens or larger.

Mixing: Shake container before pouring. First fill spray vat approximately half full with water. Then add the required amount of Pennside and finally add the remainder of the water whilst agitating the spray vat.

Compatibility: Pennside is not compatible with wettable sulphur, dinocap or emulsifiable concentrates.

Environmental Information

Dangerous to bees. DO NOT spray any plants in flower while bees are foraging. Do not contaminate ponds, streams, rivers or waterways with this product or used container. Do Not graze treated turf or feed grass-cuttings from treated area to animals or poultry.

Storage and Disposal

Store in original container tightly closed in a dry well ventilated area, as cool as possible out of direct sunlight. Do not store with fertilizers, insecticides, fungicides and seeds. Protect product from frost. Triple rinse and puncture container and dispose of in a sanitary land fill.

Safety Directions

Avoid contact with eyes and skin. Do not inhale spray mist. When preparing and using the prepared spray, elbow-length PVC gloves. After use and before eating, drinking or smoking wash hands, arms and face thoroughly with soap and water. After each days use, wash gloves.
