General Instructions

Flowable TMTD[®]
Colin Campbell (Chemicals) Pty Ltd

Turf should be in good nutritional condition before treatment otherwise some damage may occur to sensitive turf species (e.g. Fescues, bluegrass, turf type ryegrasses), if repeat applications are made too soon.

Mixing: Premix the required quantity with water and add to spray tank with agitation system operating. Agitate while spraying.

The addition of **Ultrawet** wetting agent at a rate of 10mL/100 litres will improve coverage.

Compatibility: Do not mix with lime sulphur or Bordeaux sprays.

Environmental Information

DO NOT graze treated turf or feed grass-cuttings from treated area to animals or poultry. Dangerous to Fish. Do not contaminate ponds, streams, rivers or waterways with this product or used container.

Storage and Disposal

Store in original container, tightly closed in a well ventilated area out of direct sunlight. Triple rinse container, adding rinsings to the spray tank and puncture container and dispose of in a sanitary landfill.

Safety Directions
