### ***DIRECTIONS FOR USE***

Commence using Campbell Trifol G Fertilizer after the plants have become established. Do not apply the fertilizer to young germinated seedlings or seedlings that have recently been transplanted. Trifol-G is especially useful when applied at time of flowering initiation and through to end of flowering. Applications should be made at 7-14 day intervals.

For **Flowers, Ornamentals, Shrubs, Nurseries** - Use 100-150g of Trifol-G in 100 litres of water and apply as a normal watering every 7-14 days.

**Compatibility**

Trifol-G is compatible with most pesticides. It should not be mixed with Bordeaux Mixture, Lime Sulphur or Lead Arsenate. Caution should be used when applying mixtures with pesticides to sensitive plants and young seedlings.
